

The meeting place for companies, technologies, and data

How we unleash SCION globally
together with our Partners.

Annemarie Adam, Senior Account Manager, Digital Realty

Digital Realty operates the **world's largest data center platform** – where companies, technology and data come together

5,000+

Customers

\$60B

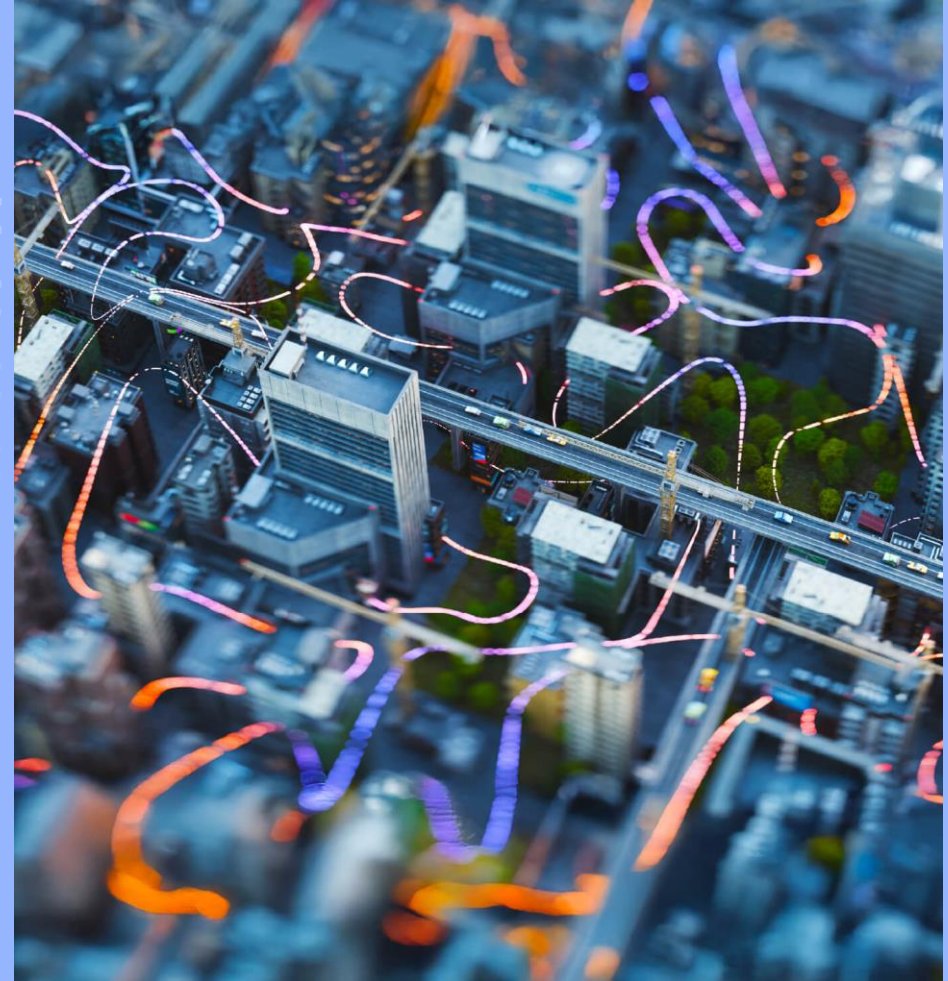

Equity market capitalization

20+

Years of expertise

\$23B

Invested in buildout

The challenges IT leaders need to solve

Complexity

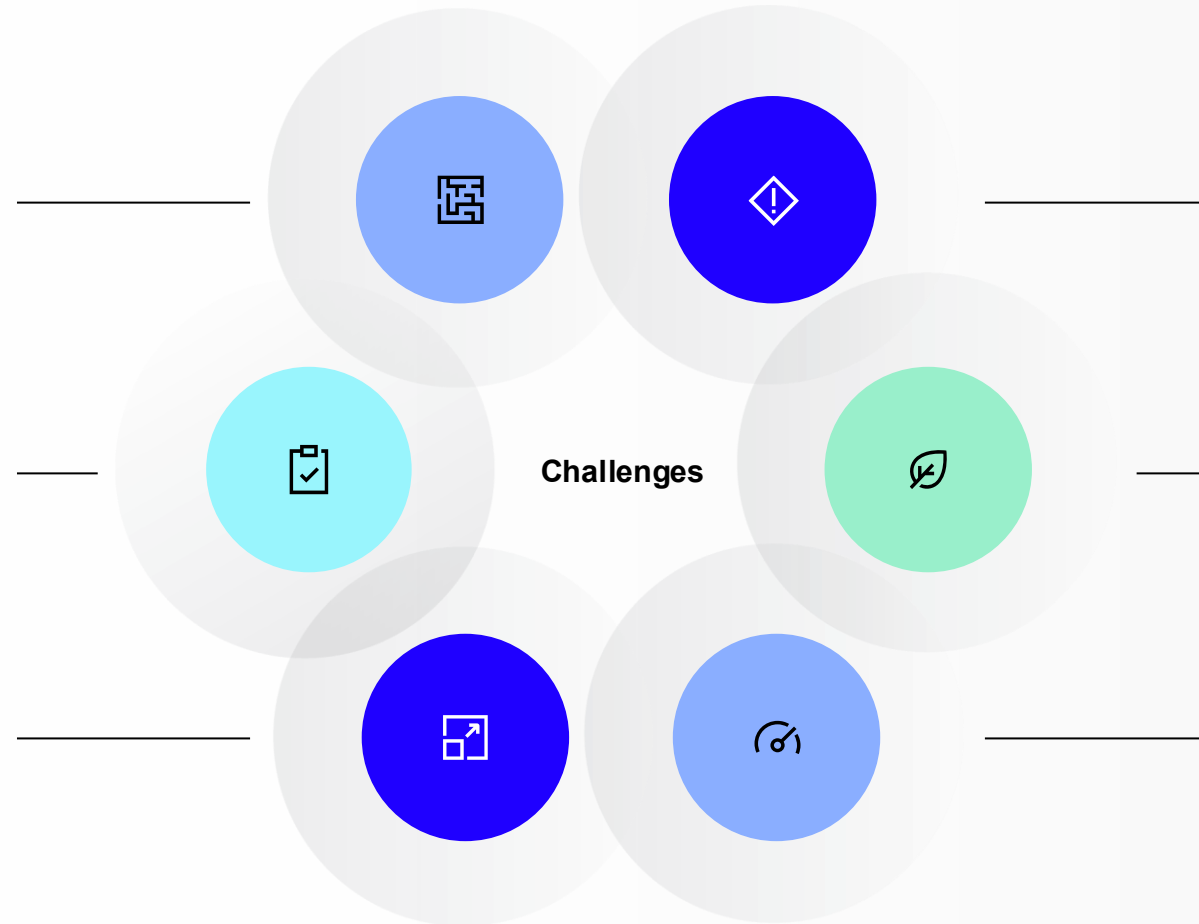

Disparate components, vendors, and multi-cloud strategies add complexity and cost

Compliance

Balancing local compliance requirements with secure, private connectivity

Capacity

With AI evolving and data expanding, it's difficult to judge capacity and proximity needs

Risk

Failure to manage risk can result in damage to a business' reputation

Sustainability

Building performant infrastructure sustainably requires expertise and experience

Performance

Apps, services, and data need to be brought to the data to minimize latency

SCION plays a key role in securing the safest ecosystem

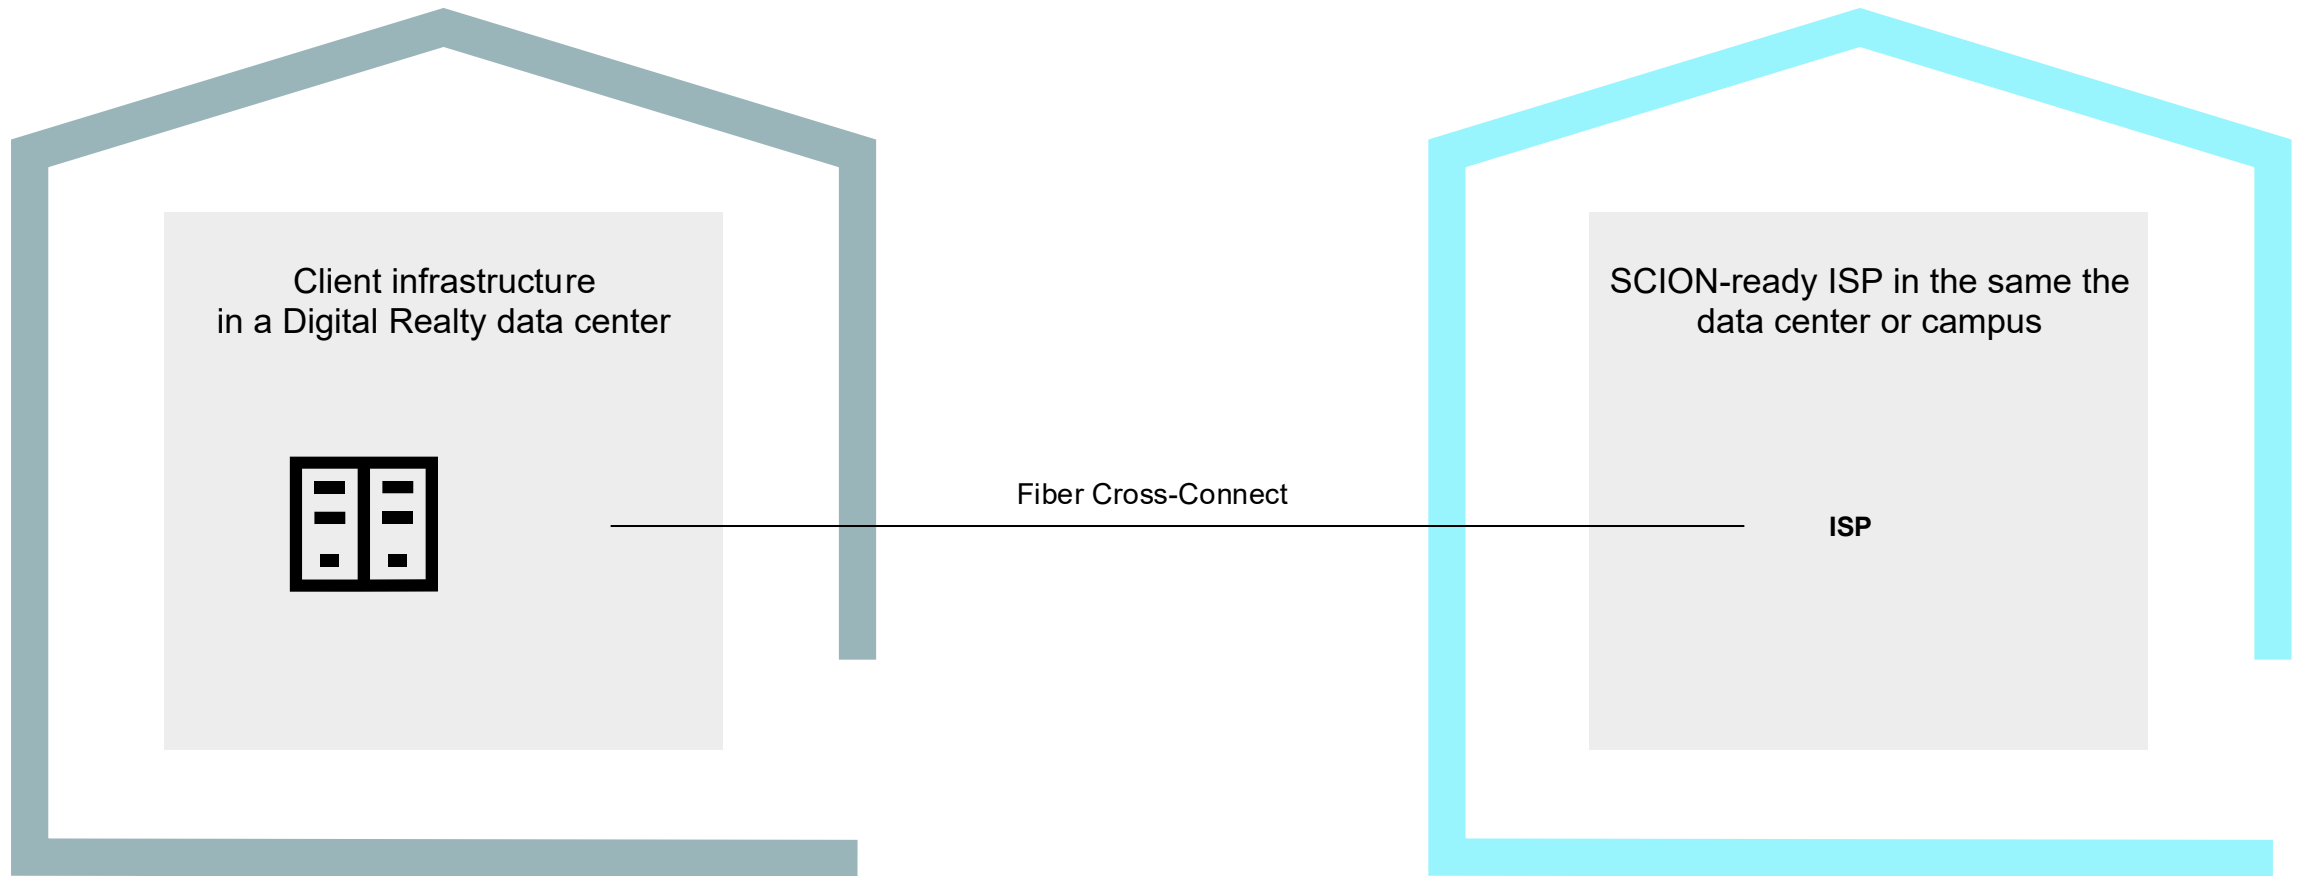

- As the global meeting place for **5,000+ customers, leading technologies, and mission-critical data**, is core to operate in a secure and scalable ecosystem and SCION is an opportunity for offering to our customer the safest ecosystem.

Digital Realty and Varsity

Welcome to:

Merijn Evertse, CTO Varsity

Digital Realty and Varsity

Turning SCION into a real-world Enterprise Solution

What we bring

- SCION Software integration
- Expertise
- Consultancy

- Direct connectivity to Varsity, AMS-IX, NL-IX and Surf
- ServiceFabric®
- Carrier Neutrality
- Global Platform

How it works

- SCION-enabled traffic runs over ServiceFabric® global platform
- Data travels via pre-authorized, verifiable paths
- Seamless integration through Varsity's SCION layer

Customer value

- End-to-end trusted communication
- Protection from DDoS & routing attacks
- Multi-path routing for resilience & performance
- Fast, global deployment

Unlocking the full potential of SCION for Enterprises
