SCION ASSOCIATION

WHAT IS SCION?

A secure connectivity architecture designed to reduce concentration risk and give organisations greater control over how critical data moves.

THE STRATEGIC NEED FOR SCION

01 Given the economic and geopolitical environment, organizations need to know and control where their data travels.

02 AI is making cyberattacks faster and more sophisticated. SCION is designed for security from the ground up and is being prepared for future threats from quantum computing.

03 Essential services should not depend on a single provider or country. SCION gives organizations a choice of providers and routes, helping them remain secure, independent and operational.

BENEFITS OF SCION

CONTROL YOUR DATA

Choose where and through whom your data travels.

SECURE YOUR SERVICES

Minimize exposure to current and future Internet threats.

ENSURE CONTINUITY

Use multiple providers to keep services running if one fails.

STAY INDEPENDENT

Avoid relying on a single technology provider through technology based on open source.

SCION ASSOCIATION

WHY ORGANIZATIONS CHOOSE SCION

ADVANCED SECURITY

Removing critical entry points off the Internet.

UNINTERRUPTED OPERATIONS

Stay connected if a provider or network fails, ensuring business continuity.

STREAMLINED INTEGRATION

Works with existing systems and can be introduced gradually (low implementation risk).

ENHANCED CONTROL

Use multiple providers to optimize your strategic data flow.

AUTOMATIC FAILOVER

Automatically chooses the best available route and switches in under a second in case of failure.

SCION provides a cost-efficient solution to achieve greater security and resilience at a positive return on investment.

SCION ASSOCIATION

ENABLING THE SUCCESS OF THE ECOSYSTEM

Non-profit organization advancing SCION adoption and collaboration across critical infrastructure

MEMBER BENEFITS

GO-TO-MARKET SUPPORT

Events, advocacy, policy engagement and visibility for members

Adoption Committee
Marketing Committee

SCION REGISTRY

Neutral allocation of SCION identifiers (ISD and AS numbers), free for members

Registry Committee

SPECIFICATIONS

Open technical standards supporting interoperability and multiple implementations

Standardization Committee

OPEN-SOURCE CORE

Maintained reference implementation, quality assurance and testing

Implementation Committee

SCION ASSOCIATION

OPEN SOURCE MAKES SCION ADOPTABLE AT SCALE

LOWER ADOPTION BARRIERS

Production-ready code gives users and integrators a faster path to deploy SCION.

REDUCE DEPENDENCY

An open core enables independent implementations and reduces reliance on a single vendor.

STRENGTHEN SECURITY

Transparent code, peer review, including unique formal verification by ETH team.

GROW THE ECOSYSTEM

A shared foundation builds market trust, vendor choice and community contribution.

FOLLOW OUR TECHNICAL BREAKOUT SESSION DURING LUNCH BREAK!

SCION ASSOCIATION

KEY MILESTONES

2012
RESEARCH BEGINS
SCION research starts at Carnegie Mellon, then at ETH Zurich.

2017
ANAPAYA FOUNDED
Anapaya Systems AG is incorporated as an ETH spin-off, significantly contributing to the open-source core.

2021
FIRST MAJOR ROLLOUT
SSFN goes live for 321 Swiss banks and financial market infrastructures.

2022
SCION ASSOCIATION TAKES STEWARDSHIP
The Association is established and takes over open-source maintenance and starts working towards an IETF specification.

2023–25
CORE MATURES
Documentation, testing, packaging, router performance, control plane and QA advance.

2026
PATENT PLEDGE ENABLES OPENNESS
Anapaya provides an open-source patent pledge supporting further open-source implementation.

NEXT
MORE VENDORS WANTED
Actively seeking additional vendors to broaden choice and strengthen the ecosystem.

SCION ASSOCIATION

STRATEGIC DIRECTION

Association's development capacity to accelerate adoption and strengthen the wider SCION ecosystem.

01

MATURE THE CORE

Reliable, stable components that are easier to deploy.

02

ENABLE USE CASES

Work with potential users to prove clear value and readiness.

03

GROW THE ECOSYSTEM

More users, requirements, contributions, memberships and solutions.
